### **Synthetic Gear Oils Cut Wind Power Operating Costs**

***Klüber's specialty lubricants for wind power applications will be on display at CanWEA 2009, September 20-23 in Toronto***

Londonderry, NH – (August 26, 2009) – Klüber Lubrication, a worldwide manufacturer of specialty lubricants, will showcase three innovative gear oils for the wind power industry at the CanWEA 2009 trade show September 20-23 in Toronto, Canada. The lubricants are Klübersynth® GEM 4 N, Klübersynth® GH 6 and Klübersynth® GEM 2.

Following extensive R&D work and a comprehensive performance test program, Klüber Lubrication has developed three synthetic high-performance, high-load gear oil products:

- Klübersynth GEM 4 N (polyalphaolefin)
- Klübersynth GH 6 (polyglycol)
- Klübersynth GEM 2 (rapidly biodegradable ester)

Klübersynth gear oils meet the demanding requirements for gear performance, and offer excellent wear protection, resistance to micro-pitting, foam and residue formation. Compared with other standard gear oils, these products show good ageing resistance, high load-carrying capacity, and low friction values. Consequently, oil change intervals are increased, power loss is reduced, and the resulting yield increases over the operative life of the turbine

Klüber's *ADDED value* program makes it easy for manufacturers and operators to simplify their lubrication requirements. For more information about Klüber's lubrication solutions for wind power applications, please visit booth 608 at CanWEA 2009 or the web site at [www.klubersolutions.com/wind](http://www.klubersolutions.com/wind).

*Klüber Lubrication, a worldwide manufacturer of specialty lubricants, has long been on the cutting edge of lubricant technology. For more than 80 years, we have been committed to providing tribological solutions for our customers, by manufacturing and supplying specialty lubricants for extreme applications. Our lubricants succeed where conventional lubricants fail. Our philosophy of product innovation demands that we work cooperatively with our customers and has earned us the reputation of reliable partner and solution provider. With representation around the globe, and a product portfolio of more than 2,000 standard lubricants, Klüber's products and services are available wherever and whenever they are needed. Lubrication is our World!*
